

RASPIRE Outreach — Joseph Goydish II

Context (from research)

- RASPIRE: YC P26, AI runtime security for mobile apps (Android/iOS). No-code hardening, real-time attack blocking, SIEM export. Protecting 20M+ end users (banking, fintech, healthtech, e-commerce).
 - Founders: Kareem Selim + Hassan Mostafa. 15 combined years offensive security, CTF/hackathon winners.
 - Their careers page: "If you've made mobile apps safer, **or broken them**, we'd love to meet."
 - "Don't see your role? Write us a short note about what you'd build, we read every email."
 - No SDR/BDR role formally posted yet → founding GTM hire is wide open.
-

Version 1 — LinkedIn connection note to Hassan Mostafa

(under 300 chars, LinkedIn limit)

Hi Hassan — saw RASPIRE is hiring. I've reverse-engineered zero-click iOS attack chains (5 NVD-published Apple CVEs, CISA KEV) and spent 3.5 yrs in cyber sales at Cyberbit. I can demo your product better than most — open to a chat about GTM.

Version 2 — Email to careers@raspire.com (the apply)

Subject: Founding SDR who's broken the apps you protect

Hi RASPIRE team —

I'm a security researcher turned cyber sales rep. I've reverse-engineered zero-click iOS attack chains (5 NVD-published Apple CVEs, CISA KEV, re-scored CVSS 10.0 via Vulnrichment) and spent 3.5 years selling to SOC/security leaders at Cyberbit and FortifyData.

Your careers page says "if you've made mobile apps safer, or broken them, we'd love to meet" — I've broken them. I know exactly who needs your product and how to get them on a call.

I don't see a GTM role posted — that's the one I'd build. Open to a 20-min chat with you or Hassan.
